

**DARLEAN SCOTT**

Female DOB: 06/12/1964

144349

Ins: Medicare Southern Region

**09/09/2021 - Office Visit**

**Provider: Mukesh Misra MD**

**Location of Care: Antelope Valley Neuroscience Medical Group**

**History of Present Illness:**

I saw DARLEAN SCOTT back in the office today. She is now just over a week since he had implantation of spinal cord stim later. She little blister from possible dressing on the battery site incision far from the incision site. She denies any fever. Her incision healing well. She denies any new issues. Pain is adequately controlled. She will follow with pain management for programming of the spinal cord stim later in next couple weeks time. Plan is to continue present management follow-up in 4-6 weeks prior appointment. Plan discussed with patient and family.

Patient complies with the 4 A's of opioid treatment.

ADL's: Patient is able to perform activities of daily living with the aid of the medications.

Adverse side effects: No side effects noted including cognitive/somnolence/respiratory depression and constipation.

Abuse: No signs of abuse, misuse or diversion

Associations: No worsening depression or anxiety.

A CURES report from the Department of Justice - Bureau of Narcotic Enforcement was reviewed and is consistent with the medications we are prescribing. Patient would recommend to continue decreasing medication for his pain. Adverse of medication discussed with patient as well.
