

DARLEAN SCOTT

Female DOB: 06/12/1964

144349

Ins: Medicare Southern Region

11/02/2022 - Office Visit

Provider: Mukesh Misra MD

Location of Care: Antelope Valley Neuroscience Medical Group

History of Present Illness:

I saw DARLEAN SCOTT in the office today for a followup consultation. She is a 58 year old woman with the complaint of neck pain. bilateral arm pain. low back pain. bilateral buttock pain. bilateral leg pain. I saw Ms. Scott in the office today. Is for follow-up for ongoing neck and back issues. More recently her back has been bothering much. She stopped smoking in the recent days. Pain is worse with activities. She has had lumbar surgery done in the past with fusion. Plan lumbar steroid block following authorization and clearance and continue medication for pain as prescribed. Plan and risk and benefit discussed with patient she understands and will follow the recommendations.

Patient complies with the 4 A's of opioid treatment.

ADL's: Patient is able to perform activities of daily living with the aid of the medications.

Adverse side effects: No side effects noted including cognitive/somnolence/respiratory depression and constipation.

Abuse: No signs of abuse, misuse or diversion

Associations: No worsening depression or anxiety.

A CURES report from the Department of Justice - Bureau of Narcotic Enforcement was reviewed and is consistent with the medications we are prescribing. Patient would recommend to continue decreasing medication for his pain. Adverse of medication discussed with patient as well.
