

DARLEAN SCOTT

Female DOB: 06/12/1964

144349

Ins: Medicare Southern Region

09/06/2023 - Office Visit

Provider: Mukesh Misra MD

Location of Care: Antelope Valley Neuroscience Medical Group

History of Present Illness:

I saw DARLEAN SCOTT in the office today for a followup consultation. She is a 59 year old woman with the complaint of neck pain. bilateral arm pain. low back pain. bilateral buttock pain. bilateral leg pain. I saw Darlene in the office today for ongoing neck and back issues. She is getting some weight reduction surgery later this month. Him give her extra 10 pills for pain control. Meantime getting medication as before and follow-up in the office per appointment. Plan discussed with patient further treatment for her neck and back issues will plan after her weight loss surgery. She understand and will follow accordingly. Patient complies with the 4 A's of opioid treatment.

ADL's: Patient is able to perform activities of daily living with the aid of the medications.

Adverse side effects: No side effects noted including cognitive/somnolence/respiratory depression and constipation.

Abuse: No signs of abuse, misuse or diversion

Associations: No worsening depression or anxiety.

A CURES report from the Department of Justice - Bureau of Narcotic Enforcement was reviewed and is consistent with the medications we are prescribing. Patient would recommend to continue decreasing medication for his pain. Adverse of medication discussed with patient as well.
