Ins: Medicare Southern Region

11/08/2023 - Office Visit

Provider: Mukesh Misra MD

Location of Care: Antelope Valley Neuroscience Medical Group

History of Present Illness:

I saw DARLEAN SCOTT in the office today for a followup consultation. She is a 59 year old woman with the complaint of neck pain. bilateral shoulder pain. bilateral arm pain. low back pain. bilateral buttock pain. bilateral leg pain. I saw Ms. Scott in the office today. She is a 59 Patient is seen for ongoing neck and back issues. She recently had surgery for laparoscopic lap banding. She is doing better she is losing weight pain is adequately managed he tells me she has not had an injection for a while and she like to try his lumbar injection scheduled for follow-up. Meantime quit medication prescribed her examination remains unchanged. Plan this can prevent discussed with patient. Patient complies with the 4 A's of opioid treatment. ADL's: Patient is able to perform activities of daily living with the aid of the medications. Adverse side effects: No side effects noted including cognitive/somnolence/respiratory depression and constipation. Abuse: No signs of abuse, misuse or diversion Associations: No worsening depression or anxiety. A CURES report from the Department of Justice - Bureau of Narcotic Enforcement was reviewed and is consistent with the medications we are prescribing. Patient would recommend to continue decreasing medication for his pain. Adverse of medication discussed with patient as well.
