02/07/2024 - Office Visit

Provider: Mukesh Misra MD

Location of Care: Antelope Valley Neuroscience Medical Group

History of Present Illness:

I saw DARLEAN SCOTT in the office today for a followup consultation. She is a 59 year old woman with the complaint of neck pain. bilateral shoulder pain. bilateral arm pain. low back pain. bilateral buttock pain. bilateral leg pain. I saw Darlene in the office today. Is along with her husband. She will follow for ongoing neck and back issues. She aggravated pain a few days ago while she was involved in from an airport. She had a lot of discomfort and pain during her last visit she is little better but still has a lot of discomfort and pain. She takes medication prescribed. Plan to schedule for block continue medication was come follow-up. Plan and risks and benefit discussed with patient if not better we may plan repeating imaging as well. Patient is plan and follow accordingly meantime examination remains unchanged. Patient complies with the 4 A's of opioid treatment.

ADL's: Patient is able to perform activities of daily living with the aid of the medications.

Adverse side effects: No side effects noted including cognitive/somnolence/respiratory depression and constipation.

Abuse: No signs of abuse, misuse or diversion

Associations: No worsening depression or anxiety.

A CURES report from the Department of Justice - Bureau of Narcotic Enforcement was reviewed and is consistent with the medications we are prescribing. Patient would recommend to continue decreasing medication for his pain. Adverse of medication discussed with patient as well.

Patient Instructions:

- 1) Please schedule a follow-up appointment in 6 weeks.
- 2) Discussed importance of regular exercise and recommended starting or continuing a regular exercise program for good health.
- 3) The patient was encouraged to lose weight for better health.
- 4) Most patients (90%) of patients with low back pain will improve with time (2-6 weeks). Limit activity to comfort and avoid activities that increase discomfort. Apply moist heat and/or ice to lower back and take medication as instructed for pain relief. Please read the Back Pain Handout and start Physical Therapy as directed.
