Female DOB: 06/12/1964

144349

Ins: Medicare Southern Region

01/30/2025 - Office Visit

Provider: Mukesh Misra MD

Location of Care: Antelope Valley Neuroscience Medical Group

History of Present Illness:

I saw DARLEAN SCOTT in the office today for a followup consultation. She is a 60 year old woman with the complaint of neck pain. bilateral arm pain. low back pain. bilateral buttock pain. bilateral leg pain. Saw Darlene in the office today she is a 60-year-old patient for ongoing neck and back issues. She recently recently had a workup done and was found to have multiple intracranial rhythms. She tells me she going in for surgery next week at the University. She otherwise denies any new issues. Her neurological exams remains unchanged. Plan to any medication treatment before and follow-up after her surgery and healing from surgery plan and risks and benefit discussed with patient and family case of acute event she has been instructed to go to urgent care and or emergency room if not follow-up per appointment.

Patient complies with the 4 A's of opioid treatment.

ADL's: Patient is able to perform activities of daily living with the aid of the medications.

Adverse side effects: No side effects noted including cognitive/somnolence/respiratory depression and constipation.

Abuse: No signs of abuse, misuse or diversion

Associations: No worsening depression or anxiety.

A CURES report from the Department of Justice - Bureau of Narcotic Enforcement was reviewed and is consistent with the medications we are prescribing. Patient would recommend to continue decreasing medication for his pain. Adverse of medication discussed with patient as well.

Certain portion of the progress note may have findings and information retrieved from the previous office visit note. This is a part of this progress note

Carisoprodol 350 Mg Tablet (Carisoprodol) Take 1 tablet by mouth three times a day as needed for spasms

Orders:

99214-FU, DETAILED (CPT-99214)

Patient Instructions:

- 1) Please schedule a follow-up appointment in 1 month.
- 2) Discussed importance of regular exercise and recommended starting or continuing a regular exercise program for good health.
- 3) Most patients (90%) of patients with low back pain will improve with time (2-6 weeks). Limit activity to comfort and avoid activities that increase discomfort. Apply moist heat and/or ice to lower back and take medication as instructed for pain relief. Please read the Back Pain Handout and start Physical Therapy as directed.
- 4) Limit activity to comfort and avoid activities that increase discomfort. Apply moist heat and/or ice to neck and take medication as instructed for pain relief. Please read the Neck Pain Handout and start Physical Therapy as directed. Plan to get a medication before patient to follow-up after her aneurysm surgery plan discussed with patient she understand follow accordingly.
