Ins: Medicare Southern Region

**08/13/2020 - Office Visit**

**Provider: Mukesh Misra MD**

**Location of Care: Antelope Valley Neuroscience Medical Group**

**History of Present Illness:**

I saw DARLEAN SCOTT in the office today for a followup consultation. She is a 56 year old woman with the complaint of neck pain. bilateral arm pain. bilateral leg pain. Patient is for follow-up for her ongoing neck and back issues. She denies any new issues. She remains on medication for pain on a when necessary basis. Her pain medication requirement stable however has been instructed to Cardona requirement her medication pain. Plan discussed with patient. Also discussed regarding spinal cord stimulator in the coming weeks for her worsening pain and chronic use of narcotics.

Patient complies with the 4 A's of opioid treatment.

ADL's: Patient is able to perform activities of daily living with the aid of the medications.

Adverse side effects: No side effects noted including cognitive/somnolence/respiratory depression and constipation.

Abuse: No signs of abuse, misuse or diversion

Associations: No worsening depression or anxiety.

A CURES report from the Department of Justice - Bureau of Narcotic Enforcement was reviewed and is consistent with the medications we are prescribing. Patient would recommend to continue decreasing medication for his pain. Adverse of medication discussed with patient as well
