Testing under LCMS category/specialty has been performed using Shimadzu Instrumentation: Models 8030 or 8040 utilizing Liquid Chromatography Mass Spectrometry (LC-MS/MS) methodology. This is a confirmation method.

^{**}Toxicology LCMS testing was developed and its performance characteristics determined by Diagnostic Laboratory Science (DLS). It has not been cleared or approved by the U.S. Food and Drug Administration (FDA). The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes and should not be regarded as investigational or for research. DLS is qualified to perform high complexity testing under the CLIA guidelines.
